

WRITING HIGHLIGHTS

Year 6 – Fruit Kebab Instructions

In Year 6, pupils recently took part in an engaging activity where they created their own fruit kebabs. This hands-on project allowed them to explore healthy eating while enhancing their teamwork and creativity. After assembling their kebabs with a variety of fresh fruits—such as strawberries, bananas, grapes, and melon—they worked collaboratively to develop clear instructions for making their own fruit kebabs. This exercise not only reinforced their understanding of healthy choices but also provided an opportunity to practice their writing skills as they crafted

step-by-step guides to share with others. It was a delicious and educational experience that sparked their enthusiasm for cooking and nutrition!

Year 4 - Homophone Search

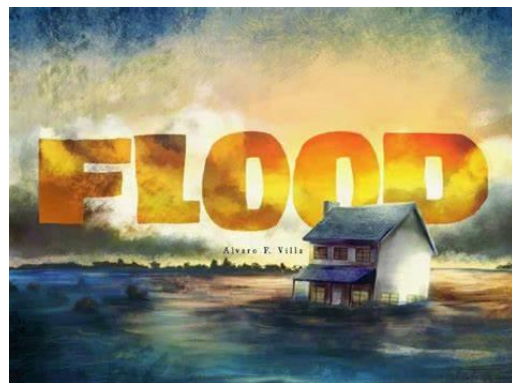

In today's English lesson, Year 4 took their learning outdoors to demonstrate their understanding of homophones. Pupils were tasked with locating various homophones and deciding which sentences they would appropriately fit into. This hands-on approach not only reinforced their grasp of the topic but also made learning enjoyable and interactive.

Year 3 Disaster Story – The Flood

In our Year 3 English lessons, pupils have been exploring the narrative of 'The Flood'. Recently, they reached a poignant moment in the story where the family returns to assess the damage to their home. To deepen their understanding, the children utilised our orienteering course to identify the extent of the destruction. They then engaged in a vocabulary bingo activity, focusing on

new words to help them describe to each other to vividly describe the devastation they observed.

Reception - Phonics

We have begun our Phonics sessions. The children are trying very hard to remember the phonemes and graphemes that they have been taught. They are practising writing their graphemes using the formation phrases and are beginning to orally blend.

Nursery - Owls

Nursery have learnt about owls. We read the story 'Wow! said the owl' and learned some facts about owls.

We learnt that owls wake up at nighttime, they have sharp claws to hunt, owl babies are called owlets and that they can nearly turn their head all the way round!

We created our own owls by firstly drawing an owl and then sticking brown feathers on our drawing.

Golden Token

At our school, we celebrate exceptional work through our "Golden Token" initiative. When children have produced outstanding pieces of writing, they have been rewarded with a golden token. This token can be used in our special vending machine, where they have the exciting opportunity to select a book of their choice as a prize. This not only motivates pupils to strive for excellence in their writing but also fosters a love for reading by allowing them to choose stories that truly interest them. We believe this initiative inspires creativity and encourages a lifelong passion for literacy.

Here are some of our winners!
