Maths multiplication maze

Learning objective: To learn tables through the corresponding division facts.

A game for two players.

- Take it in turns to roll a dice. The number on the dice needs to match the answer of one of the sums.
- You need to throw a 3 or a 1 to start. You can move your counter up, down, left, right and diagonally but only one space at a time.
- If you can't move wait for your next turn. The winner is the first one to reach the end of the maze.
